

ABSTRACT OF THE DISCLOSURE

A package for mosquito control articles having a plurality of wells within a tray. At least one of the wells has a center post with spokes radiating from the post and forming segments within the at least one well. The mosquito control article is formed in sections with one section in each segment of the at least one well. The number of sections used to treat a body of water is determined by the surface area of the body of water and the predetermined amount of active ingredient in each section of the mosquito control article. A method of use is disclosed.
